

CAPABILITY STATEMENT

SUMMARY

Grey Wolf Security specializes in cyber security, providing a wide range of solutions expertise and service offerings that ensures the security of your critical infrastructure. Grey Wolf Security is focused on the development and delivery of mission-driven solutions to complex cyber security challenges, and our professionals have significant experience serving customers in the Department of Defense, Department of Homeland Security, Federal Law Enforcement, Intelligence Community and Commercial Enterprise.

SERVICES

Security Operations

Grey Wolf Security's portfolio of security operations services extends comprehensive managed security offerings to our customers, allowing us to manage your day-to-day security needs, and provide the skilled personnel necessary to run a security operations center. Grey Wolf Security's security operations services include but are not limited to: Digital Forensics, Incident Response, Security Analysis, SOC Management and Threat Intelligence.

Security Compliance

Compliance monitoring is a high priority in both the private and public sector. Grey Wolf Security provides Continuous Monitoring, Penetration Testing, Risk Assessment, Software Assurance and Vulnerability Assessments to keep your organization compliant with the latest industry standards such as CJIS, HIPAA, NIST, PCI-DSS, RMF, SOX.

Security Engineering

Implementation, configuration and maintenance of the latest security tools is complex. You need experts who have a breadth of experience in different enterprise environments to configure these systems effectively. We have consultants ready to configure your Cloud, DLP, HIPS, IdAM, IPS, Next Gen Firewalls, SIEM, SOAR or other cutting-edge tools.

Grey Wolf Security is not just another tech company who bolts on security offerings to our services. Our consultants eat, live and breathe security so you can rest easy.
